BREAST AUGMENTATION

ENHANCE YOUR SHAPE. ELEVATE YOUR CONFIDENCE.

Many people choose Breast Augmentation to enhance their figure and feel more confident in their appearance. Whether due to naturally smaller breasts, pregnancy, weight changes, or loss of volume over time, breast size and shape can change throughout life. Breast Augmentation isn't just about increasing size—it's about creating balance, improving proportions, and helping you feel comfortable and confident in your own skin.

PROCEDURE OVERVIEW

Breast augmentation enhances the size and shape of the breasts using implants. During your consultation, your surgeon will help you select the ideal implant size, shape, profile, and placement to achieve results that complement your frame and aesthetic goals.

IMPLANT POSITIONING

- Implant may be placed above the muscle
- Implant may be placed below the muscle

Placement is based on your anatomy and is tailored to your desired outcome

HIDDEN INCISIONS

Incisions are typically placed in the breast fold to minimize visible scarring

ADD ONS TO ENHANCE YOUR RESULTS

BREAST LIFT

Raises and reshapes the breasts by removing excess skin and tightening surrounding tissue to restore a more youthful position, shape, and contour.

CHARLOTTE PLASTIC SURGERY.

YOUR SURGERY

Our estimates include the surgeon's fee, operating room, and anesthesia.

We perform the surgery on site at our AAAA-certified operating facility, which is accredited to the same standards as a hospital.

The procedure is an outpatient surgery, so you must have someone to support you after the procedure.

Arrange for a friend or family member to drive you home and stay with you during your inital recovery.

RECOVERY TIMELINE

IMMEDIATE RECOVERY:
You should expect about 5-7 days for initial recovery.

POST-SURGERY CARE:
A responsible adult should stay with you for at least 24 hours after surgery and remain on-call for any further assistance.

ACTIVITY RESTRICTIONS:
For the first 6 weeks, avoid lifting anything over 10 pounds.

FOR BREAST SURGERY:
Patients should refrain from heavy lifting for at least 4-6 weeks to ensure proper healing.

PAYMENT OPTIONS

WE OFFER A VARIETY OF PAYMENT OPTIONS FOR YOUR CONVENIENCE

- Cash, Cashier's Check, Debit/Credit
- CareCredit: up to 12 months interest-free financing
- Patient-Fi: up to 24 months interest-free financing

Note: Patient-Fi is highly recommended as it offers the highest approval rates and highest limits.

BREAST AUGMENTATION FAQ

WHAT TYPES OF IMPLANTS ARE AVAILABLE?

The most common options are silicone and saline implants. Your surgeon will help determine which option best fits your goals and anatomy.

WHAT IS THE DIFFERENCE BETWEEN SILICONE AND SALINE IMPLANTS?

Silicone implants are filled with silicone gel and are known for a natural feel, while saline implants are filled with sterile salt water after placement.

HOW DO I CHOOSE THE RIGHT IMPLANT SIZE?

Implant selection is based on your anatomy, lifestyle, goals, and desired appearance—not just a cup size.

WHAT ARE IMPLANT PROFILES?

Profile refers to how far the implant projects from the chest wall. Different profiles can create different looks even if the implant volume is the same.

WHERE ARE THE INCISIONS PLACED?

Common incision locations include the breast fold, around the areola, or in the armpit, depending on the surgical plan

IS BREAST AUGMENTATION PAINFUL?

Most patients experience tightness, pressure, and soreness during the first few days, especially with implants placed beneath the muscle.

WHEN WILL I SEE MY FINAL RESULTS?

Initial results are visible immediately, but implants continue to settle and fluff over several weeks to months.
