**CHARLOTTE
PLASTIC SURGERY.**

your best you.

There's no denying the confidence you can possess when you look as good as you feel. Allow the skin health specialists and staff at **CHARLOTTE PLASTIC SURGERY** to help you determine, from our full range of skin care options, the skin care program that's right for you. Together, we can achieve *your best you.*

It all starts with a complimentary consultation with VISIA analysis that lasts 30 – 60 minutes

We are committed to offering a variety of the latest treatments to achieve the best possible results for all skin types.

VISIA® SKIN CARE ANALYSIS

By using a series of high definition cameras and light filters, the VISIA® provides an in-depth computer analysis of skin issues such as wrinkles, pore size, sun damage, bacteria, and overall skin age. By seeing deep within your skin, you and your provider can focus on what you need most and track the effectiveness of treatments over time.

Sometimes the little things get in the way of your self-confidence – little things like smile lines, crow's feet or just a few too many wrinkles. Injectables like Botox®, Juvéderm®, Voluma, Restylane®, Radiesse®, Dysport® and Sculptra™ can help reduce lines & creases.

REJUVENATE

Some of the benefits of injectables include:

- > Minimal recovery time
- > Can resume most daily activities
- > FDA-approved

While injectables are proven to be very safe, how they are administered is crucial to both their safety and effectiveness. Regardless of how simple or involved a procedure may seem, none are taken lightly at Charlotte Plastic Surgery. When it comes to your body and health, every decision is an important one.

BOTOX® smooths out stubborn forehead creases and crow's feet by relaxing muscles that cause wrinkles. This natural purified protein can replenish your appearance while being proven ultra-safe.

DYSPORT® temporarily smooths out undesirable lines between the brows, across the forehead, or around the eyes to restore a more youthful, less stressed appearance.

THE JUVÉDERM™ FAMILY of FILLERS
(*Juvéderm Ultra XC, Juvéderm Ultra Plus XC and Juvéderm Voluma XC*) fill in deep creases, replace lost facial volume in the cheeks and under-eyes, and contour lips & cheeks with dermal fillers. Juvéderm fillers contain hyaluronic acid, one of the major components of the dermal connective tissue matrix.

KYBELLA™ is the first and only FDA-approved injectable drug that dissolves fat in the submental area, commonly known as the “double chin”. Many patients experience an improved chin profile in two to four treatment sessions spaced at least one month apart.

RADIESSE® is the first FDA-approved injectable dermal filler specifically designed for rejuvenating thin, aging hands.

RESTYLANE® gives your lips and face a natural beauty lift with crystal-clear, non-animal biodegradable gel. Restylane produces an instantaneous, long-lasting enhancement and is safe and gentle on your skin.

INSTALIFT™ this single treatment immediately redefines mid-facial contours with state-of-the-art suspension sutures. The face is immediately lifted and volumized without the challenges of traditional facial surgery.

SCULPTRA™ improves shallow to deep facial wrinkles and folds for a more youthful appearance. Sculptra is made from poly-L-lactic acid which stimulates the growth of collagen, helping replace lost volume, and can last up to two years.

At Charlotte Plastic Surgery we offer a variety of skin care treatments including superficial refining peels that vary in strength.

The most common peels include Alpha Hydroxy Acids such as Glycolic and Lactic acid and Beta Hydroxy Acid such as Salicylic Acid. We use superior brands to give our patients safe and effective results.

REFINE

Superficial peels are designed to gently exfoliate the superficial outer layer of the epidermis to reveal healthy, brighter skin. For optimal results, a series of peels may be recommended to help minimize hyperpigmentation, fine lines and recent acne scars. In conjunction with your customized treatment plan, our skin health professionals will recommend a suitable at home skin care regimen based on the condition of your skin and your lifestyle.

SKINMEDICA®

ILLUMINIZE PEEL this mild peel offers gentle exfoliation while minimizing mild sun damage, fine lines, mild acne breakouts and blackheads. Skin will be smoother and brighter. *Minimal to no peeling.*

VITALIZE PEEL this moderate peel is recommended for mild sun damage, hyperpigmentation, fine lines, wrinkles and acne scarring - ideal for clients who are already on a skin rejuvenation program. *3-5 days of flaking or peeling skin.*

REJUVENIZE PEEL this deeper peel is recommended for more moderate to severe skin conditions such as significant sun damage, hyperpigmentation, melasma and acne scarring. *5-7 days of peeling skin.*

PCA SKIN®

SENSI PEEL this treatment minimizes redness and inflammation for dry, sensitive, acne prone skin while improving overall texture & brightness. Safe for all skin types, *2-3 days of flaking skin.*

DETOX GEL PORE TREATMENT often used during facials to promote extractions, this treatment leaves your skin clean, purified and nourished.

OXYGENATING TRIO is a rich blend of enzymes, botanicals & antioxidants. Perfect for pregnant, lactating mothers, asphyxiated skin, dull complexion, and breakout-prone skin.

PCA PEEL HQ FREE this enhanced Jessner's solution is ideal for more sensitive skin and will improve the appearance of breakout-prone skin.

ULTRA PEEL 1 is specifically designed to treat matured, aging skin; it improves the appearance of fine lines & wrinkles, skin laxity, uneven skin tone, dryness, and uneven texture.

SKINCEUTICALS® PEELS

SENSITIVE SKIN SOLUTION LACTIC PEEL great for all types of skin, this peel decongests pores and deeply hydrates the skin; the perfect add on to a Dermaplane or Microdermabrasion treatment.

ADVANCE CORRECTIVE PEEL dramatically diminishes the appearance of discoloration while smoothing texture and refining the appearance of pores. Restores your skin to a brighter, more clarified tone.

In addition to chemical peels we offer condition-specific facials to give our patients a refreshed appearance with little to no downtime. Cleanse, hydrate, nourish, and protect your skin with these highly

REFRESH

Our facials are customized based on a patient's skin care concerns. Our Skin Health Professional will choose the best products and methods to improve the overall health of your skin.

DERMALINFUSION exfoliate away rough, dry skin with a diamond tip, suction impurities from your pores with a vacuum system, and deeply infuse serums into the skin - all simultaneously. Addresses fine lines and wrinkles, sallowness, dark spots, sun damage, melasma, blemishes, dry and dehydrated skin, and rough skin texture.

DERMAPLANE FACIAL a medical grade dermablade exfoliates the outer layer of skin and removes the superficial vellus hair. Skin is left smoother and brighter. A customized mask or peel is applied afterwards for a deeper exfoliation and provides an immediate glow.

SKINMEDICA® ILLUMINIZE FACIAL a deep cleanse and Dermaplane treatment is followed by a purifying enzyme mask. SkinMedica's Illuminize Peel is then applied to gently slough away dry, damaged skin.

SKINMEDICA® ESSENTIALS FACIAL a gentle cleanse and exfoliation is followed by the TNS Hydrating Masque, infusing the skin with human growth factors, proteins and antioxidants. Addresses sun damaged, dehydrated and mature skin needs while promoting hydration and radiance.

SKINMEDICA DETOXIFYING FACIAL is ideal for patients with oily, acne prone, & distressed skin. Gentle cleansing and exfoliation is followed by a purifying mask and PCA Oxygenating Trio to heal, hydrate, and soothe the skin.

Oftentimes, fixing skin concerns means targeting problems on a cellular level. Collagen-induction treatments accomplish just that and allow us to treat your skin from the inside out. By utilizing gentle, controlled injury to your skin cells, we accomplish targeted healing to specific areas of the face, hands, chest, and neck.

REPAIR

By harnessing your body's own natural healing process, new collagen, elastin and skin cells are created. Your body is essentially repairing itself piece by piece and the result is better skin quality and tone. Problems such as laxity, coarse texture, discoloration, and overall aging is significantly improved.

COLLAGEN INDUCTION

MICRONEEDLING The SkinPen handheld device encourages the body's own healing process to produce new healthy skin. Can be used on all skin types to tighten & lift the skin, and reduce acne scars, surgical scars, and stretch marks. Mild redness for a few hours.

MICRONEEDLING WITH PRP uses platelet rich plasma to infuse your skin with hundreds of your own human growth factors. Collagen regeneration is increased and remaining PRP can be injected to rehydrate and repair tissues. Helps with skin quality, anti-aging, and volume loss. Mild redness for a few hours.

SCITON™ BBL CORRECTIVE (broadband light) the intense pulsed light energy restores skin to its natural beauty by making it clearer, smoother, and more vibrant. Targeted heat energy stimulates your skin cells to regenerate, treating melasma, years of sun exposure, acne, loss of firmness, small blood vessels and rosacea, fine lines & wrinkles, and overall skin aging. Mild redness for a few hours.

SCITON™ FOREVER YOUNG BBL (broad-band light) is the only treatment that has been shown to change the expression of genes associated with aging. A Stanford University study shows that with regular treatments, patients' skin looks clear, smooth, and much younger, with many appearing younger 10 years after treatment than before any treatment. Mild redness for a few hours.

SCITON™ HALO LASER Reduce pore size, improve tone & texture, and renew aging skin. The Sciton hybrid-fractional laser provides noticeable long-term results with minimal recovery time. This highly customizable treatment causes deep dermal rejuvenation and epidermal renewal for beautiful results without lengthy downtime. Possible crusting for a few days, redness for up to one week.

SCITON™ CONTOUR TRL (Tunable Resurfacing Laser) safely remove layers of skin to a specific depth with micron precision. A single treatment stimulates the growth of new collagen, improving the skin's thickness and resilience. The skin surface will also re-grow with fresh, healthy cells, which will give your skin a younger, rejuvenated appearance. Downtime 3-6 weeks.

PRONOX this patient administered and controlled Nitrous Oxide Delivery System can be added to any injectable, laser, or collagen induction treatment to reduce anxiety and discomfort. Ideal for laser and injection treatments.

BODY CONTOURING

COOLSCULPTING the only FDA-cleared, non-surgical fat reduction treatment that uses controlled cooling to eliminate fat that is resistant to diet & exercise. Commonly treated areas include the abdomen, love-handles, bra-roll, upper arms, double-chin and inner & outer thighs. No downtime, can resume normal activities same day.

MEDICAL GRADE PRODUCTS

We offer an extensive selection of product lines that are designed to combat specific skin health concerns and aging while maintaining your skin's wellbeing and appearance. These rigorously tested lines are extremely potent and effective, restoring, rejuvenating, and protecting your skin.
